## Paper 1 Inorganic and Physical Chemistry

---

Time allowed: 2 hours

### Materials

For this paper you must have:

- the Periodic Table/Data Booklet, provided as an insert (enclosed)
- a ruler with millimetre measurements
- a scientific calculator, which you are expected to use where appropriate.

### Instructions

- Use black ink or black ball-point pen.
- Fill in the boxes at the top of this page.
- Answer **all** questions.
- You must answer the questions in the spaces provided. Do **not** write outside the box around each page or on blank pages.
- If you need extra space for your answer(s), use the lined pages at the end of this book. Write the question number against your answer(s).
- All working must be shown.
- Do all rough work in this book. Cross through any work you do not want to be marked.

Hair bleach solution contains hydrogen peroxide.

A sample of hair bleach solution is diluted with water.

The concentration of hydrogen peroxide in the diluted solution is 5.00% of that in the original solution.

A 25.0 cm<sup>3</sup> sample of the diluted hair bleach solution is acidified with dilute sulfuric acid.

This acidified sample is titrated with 0.0200 mol dm<sup>-3</sup> potassium manganate(VII) solution.

The reaction is complete when 35.85 cm<sup>3</sup> of the potassium manganate(VII) solution are added.

**0 3 . 1**

Give an ionic equation for the reaction between potassium manganate(VII) and acidified hydrogen peroxide.

Calculate the concentration, in mol dm<sup>-3</sup>, of hydrogen peroxide in the original hair bleach solution.
